⊙ Fabrice-Perso

Objective/Profile

Passionate about technological innovation with solid expertise in web development. I have reinvented myself as a Full Stack Developer, creating robust and user-centered solutions. Known for my ability to solve complex problems, I thrive in dynamic and collaborative environments, with a continuous quest for self-improvement.

Degrees and Training

- 2024 : **Web Integrator -** OpenClassroom (Equivalent to 2 years of higher education)
- 2018 : **Advanced SQL Server -** Orsys
- 2018 : **VBA EXCEL -** FortimeLp
- 2008 : **D.U.T. GEA** Finance-Accounting Major - University of Perpignan

OpenClassrooms Certifications

- 2023 : **Git and GitHub**
- 2024 : **MySQL**
- 2024 : **Increase Your Traffic with SEO**

Languages : English Professionnel

Soft Skills : Team spirit, Adaptability, Complex problem-solving, Clear and effective communication

Key Skills

- **Languages and Frameworks :** HTML, CSS, JavaScript, TypeScript, PHP, React, Redux, Next.js, Laravel, VBA, MySQL, PhpMyAdmin
- **Tools and Technologies :** Git, GitHub, Azure DevOps, Synology NAS, REST APIs, SEO, Mail Servers
- **Methodologies :** Agile (Scrum), Project Management, Version Control, Process Automation
- **Database Management :** MySQL, Access

Professional Experiences and Personal Projects

Web and VBA Developer | Septeo ADB | 2013 - 2023

- Development and maintenance of dynamic websites (HTML, PHP, JavaScript), automating manual input processes, saving 3 to 4 hours over the total duration of projects, thus reducing client downtime and enhancing satisfaction.
- Development in VBA Excel to automate accounting controls related to migration tasks, reducing the overall project duration by half a day to a full day through process automation, thereby improving overall efficiency.
- Active participation in Agile sprints and ticket management in Azure DevOps, with rigorous version tracking via Git.

Technical Referent, Procedure Writer | 2016 - 2023

- Database migration as part of a software change, with a focus on ensuring continuity of operations.
- Writing procedures and technical documents to improve process quality and consistency.
- **Impact :** Reduced client-side downtime and improved overall process.

Support Technician | 2013 - 2016

- User support for workstations, Active Directory (AD) account management, and technical documentation writing.
- Advanced support on the Office suite and team management as Teamleader Backup.

N1 and N2 Support Technician | Computacenter | 2010 - 2013

- User support for workstations, Active Directory (AD) account management, and technical documentation writing.
- Advanced support on the Office suite and team management as Teamleader Backup.

My Budget (Web Application) | 2023

- Transformed an Excel VBA tool into a web application for personal finance management.
- Development using React (front-end) with Redux for state management, and Laravel for the back-end, with a secure API.
- Hosted on a Synology NAS and creation of a personal mail server.
- **Impact :** The application offers an improved user interface and greater flexibility compared to the Excel version.

Personal Finance Management (Excel VBA) | 2019

- Developed a tool in Excel VBA for daily bank account management, including an Access database.
- **Impact :** Simplified financial management with automated analysis reports and multi-user features.
